

## Investigaciones recientes relacionadas con la avifauna Mesoamericana

Compilado por Dr. Gerardo Avalos

Alvarado, E. V., Mora, J. M., Campos-Villalobos, J., & López, L. I. (2024). Progressive Greying in the Blue-gray Tanager, *Thraupis episcopus* (Linnaeus, 1766), in Costa Rica. *Caribbean Journal of Science* 54(1): 26-31. <https://doi.org/10.18475/cjos.v54i1.a4>

Ausprey, I. J., Newell, F. L., & Robinson, S. K. (2024). Dispersal limitation predicts the spatial and temporal filtering of tropical bird communities in isolated forest fragments. *Functional Ecology* 38(1): 179-193.

Barreto, E., Boehm, M. M., Ogutcen, E., Abrahamczyk, S., Kessler, M., Bascompte, J., ... Y Graham, C. H. 2024. Macroevolution of the plant-hummingbird pollination system. *Biological reviews of the Cambridge Philosophical Society*. <https://doi.org/10.1111/brv.13094>

Falconí-López, A., Mitesser, O., Schaefer, H. M., Blüthgen, N., Busse, A., Feldhaar, H., ... y Donoso, D. A. 2024. Habitat niches of bird species along a recovery gradient in the Chocó tropical forest. *Ecological Indicators* 166: 112260.

Maglianesi, M. A., Varassin, I. G., Ávalos, G., y Jorge, L. R. 2024. A phylogenetic perspective on ecological specialisation reveals hummingbird and insect pollinators have generalist diets. *Oikos*: e10208. <https://doi.org/10.1111/oik.10208>

Santos, B. A., Alvarado, F., y Morante-Filho, J. C. 2024. Impacts of urbanization on multiple dimensions of bird diversity in Atlantic forest landscapes. *Global Ecology and Conservation* e03078.

Tonetti, V., Bocalini, F., Schunck, F., Vancine, M. H., Butti, M., Ribeiro, M., y Pizo, M. 2024. The Protected Areas network may be insufficient to protect bird diversity in a fragmented tropical hotspot under different climate scenarios. *Perspectives in Ecology and Conservation* 22(1): 63-71.
